This is an example document demonstrating the auto-bibliography fetcher. We can cite papers using their ADS bibcodes like **Cheng:2025fdu**, arXiv preprints like **arXiv:2103.12345**, or INSPIRE-HEP entries like **Weinberg:1967tq**.

Some more citations for testing:

- Another arXiv citation: **2505.03934**

- Multiple citations: **Cheng:2025fdu**; **Fabbri:2025cfg**

- ADS has rate limited me, so I will add an example later on

2 Results

The results show that **arXiv:2103.12345** found interesting correlations, while (**arXiv:2103.12345**) provided theoretical background.
